Prior to, or upon completion, of the initial term of this contract, the County shall have the option to renew this contract for an additional four (4) one (1) year period(s). Prior to completion of each exercised contract term, the County may consider an adjustment to price based on changes in the following pricing index: Consumer Price Index (CPI). It is the vendor's responsibility to request in writing any pricing adjustment under this provision. For any adjustment to commence on the first day of any exercised option period, the vendor's written request for adjustment should be submitted prior to expiration of the then current contract term. The vendor adjustment request must clearly substantiate the requested increase. The written request for adjustment should not be in excess of the relevant pricing index change. If no adjustment request is received from the vendor, the County will assume that the vendor has agreed that the optional term may be exercised without pricing adjustment. Any adjustment request received after the commencement of a new option period shall not be considered.

The County reserves the right to reject any written price adjustments submitted by the vendor and/or to not exercise any otherwise available option period based on such price adjustments. Continuation of the contract beyond the initial period, and any option subsequently exercised, is a County prerogative, and not a right of the vendor. This prerogative will be exercised only when such continuation is clearly in the best interest of the County.

**Section 2.6.2: Price Redetermination - Fuel**

This provision applies in addition to the CPI adjustment procedure applicable to option period renewals. If the retail price of fuel increases by ten percent (10%) or more from the price of gasoline as published by the Oil Price Information Service (OPIS) <http://www.opisnet.com> for unleaded gasoline, Florida PAD 1, Orlando, on the beginning date of the contract, the contractor may petition the Procurement Services Director (Director) for an increase in the contract price(s).

Any increase in the contract price(s) will be the pro-rata cost of fuel to the contractor's total cost of the product or service.

[example: if the cost of fuel increases by twelve percent (12%) and the fuel cost accounts for ten percent (10%) of the cost of the product or service, then the contract price may be increased by one-point-two percent (1.2 %)].

The contractor shall provide a complete written cost analysis for each contract price to be adjusted. This analysis shall include all costs including administrative, overhead, material(s), labor [labor units per price and actual documented labor cost per hour], fuel, insurance, profit, and any other cost associated with providing each product or service. Failure to provide the detailed cost analysis with each request for a price redetermination due to fuel price escalation shall preclude any such price redetermination. The contractor shall be solely responsible for providing documentation on the OPIS prices.

If the Director grants an increase in the contract price based upon increases in fuel prices, then the Director may also automatically adjust the contract price downward if the cost of fuel decreases by ten percent (10%) or more from the date of the last increase in the contract price.

This clause may be used in addition to any other price redetermination clause in this invitation.

The invoice shall be submitted to the County Department within thirty (30) calendar days after the service has been rendered. It shall be understood that such invoices shall not be submitted for payment until such time as the service and deliverable for the task has been completed and a County representative has reviewed and approved the service and deliverable.

All invoices shall contain the contract and/or purchase order number, date and location of delivery or service, and confirmation of acceptance of the goods or services by the appropriate County representative. Failure to submit invoices in the proscribed manner will delay payment, and the vendor may be considered in default of contract and its contract may be terminated. ### **Section 2.8: Insurance**

Each vendor shall include in its solicitation response package proof of insurance capabilities, including but not limited to, the following requirements: [This does not mean that the vendor must have the coverage prior to submittal, but, that the coverage must be purchased and in place prior to a purchase order or contract being executed by the County.]

### **Section 2.9: Offer Guaranty/ Bonds**

Not applicable to this solicitation

### **Section 2.10: Delivery**

Not applicable to this solicitation.

**Section 2.11: Acceptance of Services and Liquidated Damages**

Services rendered under the contract will not be deemed complete until a physical inspection of service(s) is (are) accepted by the County and shall be in compliance with the terms herein, fully in accord with the specifications and of the highest quality.

Any service(s) procured as a result of this solicitation may be evaluated for compliance with specifications. In the event that the service is found to be defective or does not conform to the specifications, the County reserves the right to require corrective action as appropriate which may include, but not be limited to, ordering re-performance of service, assessment of liquidated damages, or termination of the contract for default. The County will not be responsible to pay for any service that does not conform to the contract specifications.

Any defective service or any service not delivered or performed by the date specified in the purchase order or contract, may be procured by the County on the open market, and any increase in cost may be charged against the awarded contractor. Any cost incurred by the County in any re-procurement plus any increased product or service cost shall be withheld from any monies owed to the contractor by the County for any contract or financial obligation.

**Liquidated Damages:** The County and the Contractor recognize that, since time is of the essence for services as part of this Contract, the County could suffer financial loss if the work is not completed within the time specified. Therefore, The County shall be entitled to assess, as liquidated damages, but not as a penalty, the appropriate charge in accordance with the following table, for each calendar day after the scheduled completion date. The project shall be deemed to be completed on the date the work is deemed complete to the satisfaction of the Project Manager. The Contractor hereby expressly waives and relinquishes any right which it may have to seek to characterize the above-noted liquidated damages as a penalty. The parties agree that the liquidated damages sum represents a fair and reasonable estimate of the County's actual damages at the time of contracting if the Contractor fails to complete the work in a timely manner. The vendor shall not be liable if failure to perform arises out of causes beyond its control and without fault or negligence of the vendor.

The liquidated damages shall be as follows:

<u>Per Cycle Price</u>	<u>Charge Per Calendar Day</u>
\$5,000 and under.....	\$25
Over \$5,000 but less than \$10,000.....	\$75
\$10,000 or more but less than \$20,000.....	\$150

Over \$50,000 but less than \$250,000.....	\$544
\$250,000 or more but less than \$500,000.....	\$634
\$500,000 or more but less than \$2,500,000.....	\$1,288

In addition to any other consequence provided for by the contract, any Contractor that is in default for not completing the work within the time specified may be removed from the bidder's

list, at the option of the County, and not permitted to bid work for Lake County until the project is complete and the liquidated damages sum is satisfied.

The County shall retain from the compensation to be paid to Contractor the above described sum. If the Contractor continues to fail to complete any or all remaining scheduled work, the County may charge the Contractor any additional costs that would be incurred over and above the original contract cost. This amount shall be considered a minimum to complete all remedial work, correct deficient work, clean up the project and other miscellaneous tasks as required to complete all work specified. This amount is in addition to the liquidated damages prescribed above and shall not be construed as a penalty.

#### Deficiencies in Work to be Corrected by the Vendor

The vendor shall promptly correct all apparent and latent deficiencies and/or defects in work, and/or any work that fails to conform to the contract documents regardless of project completion status. All corrections shall be made within the time frame stated in the Scope of Work after such rejected defects, deficiencies, and/or non-conformances are verbally reported to the vendor by the County's project administrator, who may confirm all such verbal reports in writing. The vendor shall bear all costs of correcting such rejected work. If the vendor fails to correct the work within the period specified, the County may, at its discretion, notify the vendor, in writing, that the vendor is subject to contractual default provisions if the corrections are not completed to the satisfaction of the County within the time frame stated in the Scope of Work after receipt of the notice. If the vendor fails to correct the work within the period specified in the notice, the County shall place the vendor in default, obtain the services of another vendor to correct the deficiencies, and charge the incumbent vendor for these costs; either through a deduction from the final payment owed to the vendor or through invoicing. If the vendor fails to honor this invoice or credit memo, the County may terminate the contract for default.

These documents can be ordered from the State of Florida

Department of Transportation, Maps and Publications Department, 605 Suwannee Street, Tallahassee, Florida, 32399-0450, Phone: 904-488-9220. The Contractor shall also comply with the most current and applicable O.S.H.A. standards. The Contractor shall be responsible for obtaining a copy of this manual by contacting F.D.O.T. Maps and Publications Department in Tallahassee.

All sweeping shall be accomplished in the same direction as the traffic flow. Sweeping against the traffic shall not be permitted.

### **Safety**

All safety devices installed by the manufacturer shall be in place and in proper working order at all times. If the Project Manager or designee or designee determines that equipment is deficient in safety devices, the Contractor shall be notified immediately. The Contractor shall immediately repair, or remove the equipment from service until the deficiency is corrected to the satisfaction of the Project Manager or designee or designee.

A County representative may periodically monitor work site for safety. Should there be safety and/or health violations, the Project Manager or designee may have the authority, but not the duty, to require the Contractor to correct the violation in an expeditious manner. If there is any situation that is deemed unsafe by the Project Manager or designee or designee, the project will be shut down immediately upon notice and will not resume work until the unsafe condition has been remedied.

Should the work site be in a hazardous area, the County shall furnish the Contractor with information concerning hazards such as types or identification of known toxic material, machine hazards, Material Safety Data Sheets, or any other information that would assist the Contractor in the planning of a safe work site.

The Contractor shall be aware that while working for the County, representatives from agencies such as the United States Department of Labor, Occupational Safety and Health Administration (OSHA), and the Division of Safety, State of Florida, are invitees and need not have warrants or permission to enter the work site. These agencies, as well as the County safety representative, enter at the pleasure of the County.

**Cycle Time and Related Performance Penalty**

The roads designated shall be swept a minimum of once every **30 calendar days**. The frequency at which the roads are swept can be adjusted by the Project Manager or designee or designee or designee by either increasing or decreasing the number of cycles, with any resultant cost change based on the applicable bid amount.

All work performed on local roads within subdivisions, shall be accomplished between the hours of 7:00 A.M. and 4:00 P.M., Monday through Friday, and no work shall be performed on Saturdays, Sundays, or County Holidays, unless otherwise authorized by the designated Lake County Project Manager or designee. Functional classified roads or heavy traveled roadways, as identified by the Project Manager or designee or designee, must be avoided during peak traffic hours (between 6:00 a.m. and 9:00 a.m. and between 3:00 and 6:00 P.M.). Special schedules for heavily traveled local roadways shall be discussed and established in writing by the Project Manager or designee or designee and the Contractor. Schedules may be revised and adjusted as necessary.

To avoid interference with trash containers within the roadway, there shall be no street sweeping allowed on trash pick-up days within subdivisions. It shall be the responsibility of the Contractor to verify with the haulers their schedules, so that the Contractor can schedule accordingly. This information can be obtained by calling Solid Waste at (352) 343-3776.

If adverse weather conditions develop at the beginning or during a scheduled sweep, the sweep may be discontinued or postponed and rescheduled upon agreement of the Project Manager or designee or designee and the Contractor. If a shut down occurs, less than five (5) hours worked shall constitute one half (1/2) working day and five (5) or more hours worked shall constitute one (1) working day. This formula shall be used if the Contractor is requesting an extension of time. If the Contractor is requesting an extension it shall be done verbally, and followed up in writing within two (2) days of the request. Failure to submit the request in writing within the specified time frame shall cause the Contractor to not be granted the extension.

**The Contractor shall submit a monthly and daily work schedule prior to beginning any work. The daily work schedule shall contain the route to be followed and the location of work on each day. If there was a variance of the submitted daily schedule from the previous day or an anticipated variance for the current day, the Contractor shall contact the Project Manager or designee or designee by telephone, fax, or e-mail with the notification. This notification shall occur before 9:00 A.M.**

Established completion times shall not be extended because of any unwarranted delays for which the Contractor is responsible, but may be extended by the County because of delays caused by governmental action or other conditions beyond the control of the Contractor. During the progress of the Contractor's work, the Contractor may adjust the work force to meet the schedule; but time adjustments may be made only upon written approval by the County.

Failure to complete a cycle within the specified time frame may render the vendor subject to a performance penalty assessment “as specified in Section 2.11”. This performance penalty may be assessed for each additional day required by the vendor beyond the specified thirty (30) calendar cycle completion period to fully complete a performance cycle.

**Final Inspection**

Within 24 hours after the scheduled time of sweeping, according to the schedule submitted by the Contractor as described in the “CYCLE TIME” Section, the Project Manager or designee or designee may make a final inspection. The Contractor shall be notified verbally immediately and then followed in writing within two (2) days of any deficiencies found. In the event of unsatisfactory work, the Contractor shall repeat the work without additional compensation, within 72 hours of notification. Upon completion of the deficiencies found, the Contractor shall notify the Project Manager or designee so that an inspection can be made. If there are still deficiencies found the Contractor shall be notified as above. For the additional re-inspection, the contractor shall be assessed an eighty (\$80.00) dollar fee as liquidated damages for each re-inspection. The \$80.00 fee is assessed to offset the additional County labor required for unnecessary inspections. This fee shall be deducted from the final invoice for the applicable release order.

**Measurements**

All areas shall be swept from edge of pavement to edge of pavement and in such a manner as it shall remove all sand, dirt, leaves and debris.

Areas to be cleaned shall be the entire street/road, curb to curb, along with turn out lanes, including intersections, all curb lane dividers and around the raised traffic islands. The width shall be sufficient to encompass the entire width of street/road, curb and gutters, valley gutters, bridge decks and curbs, inside and outside highway interchange ramps (with paved shoulders greater than one foot width), outside and median paved shoulders, barrier walls, gore areas, and other designated sites.

Streets/Roadways have been inventoried and total swept feet calculated as to quantities by measuring the street length. One-curb foot is defined as a minimum of eight (8') feet wide and one (1') foot long, either continuous or accumulated in areas to be swept.

Continuous turn lanes have been inventoried by measuring the length of the lane and are defined as the length swept at a minimum of twelve (12') feet wide and one (1') foot long.

Divided roads shall be noted on the bid sheet and shall be measured for the total length. The contractor shall be responsible to sweep all curbs on both sides of the street/road.

Quantities may be increased or decreased at the discretion of the County. Any discrepancies or disagreements concerning quantities and limits of work shall be mutually resolved prior to beginning work in any area in question. Areas requiring more than one sweeping pass to sufficiently remove the debris shall not be compensated twice. All work locations shall be

provided by the County in an “as is” condition. Schedules may be revised to accommodate problem areas. **Sweeping shall not be required during road construction work. If no sweeping is done on a road, those curb/lane feet shall not be paid for by the County.**

### **Trash and Debris Disposal**

Stockpiling or disposal of debris on the County’s right of way shall not be permitted. It shall be the Contractors responsibility for the proper disposal of the debris accumulated as part of this bid. Debris shall be disposed of by the Contractor in accordance with all Federal, State, and local laws, rules and regulations in effect at the time of disposal. Cost involved with the disposal of the debris shall be included in the contract unit price.

The Contractor is responsible for keeping a log of all quantities of debris. A copy of all disposal tickets and the log shall be included with the invoice for payment.

If at any time the Contractor encounters what is assumed to be hazardous waste while completing the work in connection with this bid, the Contractor shall notify Project Manager or designee or designee of the waste so that the proper measures can be initiated for disposal of the item.

### **Method of Operations**

All streets and intersections shall be swept clean and no piles of debris shall be left anywhere within any street or public right-of-way that is being swept. Intersections shall be swept clean, including all lane dividers and around the raised traffic islands. All areas are to be swept from edge of pavement to edge of pavement and in such a manner as shall remove all sand, dirt, leaves and debris. Hand sweeping shall be required wherever necessary to meet the above noted standards. Water can be used as required to control dust but shall only be accomplished by the process and equipment that is part of the street sweeping equipment. No flooding of any areas to be swept shall be allowed. It shall be the Contractors responsibility to acquire the water and shall be part of the bid.

Extra care shall be taken in the loading and transportation of street sweeping debris and other waste so that none of the collected material is left either on private property, public property, or on the street. Any waste left on private property, public property, or on streets by the Contractor shall be immediately removed. The Contractor shall be responsible for the cleaning of all debris spilled or tracked on any street, public place, or private property by any of its equipment. If the Contractor fails to clean the same within the same day that notice is given by the County, the County may cause such streets to be cleaned and charge the costs to the Contractor. The County is authorized to deduct such costs from any payments due to the Contractor.

Overhanging branches: If the Contractor encounters overhanging branches in the areas to be swept, the Contractor shall go around the branches, unless the sweeping can be maneuvered under the branches safely, and without causing damage to the equipment or the branches. The Contractor shall notify the County of the location of any and all overhanging branches, which interfere with the Contractor’s ability to sweep the designated sweeping areas.

The Contractor may encounter debris that is larger than the mechanized sweeper can remove, such as but not limited to; tires, tire parts, hubcaps, large stones, boxes, tree limbs, wood, cable and other such materials. If this occurs, the Contractor shall move this debris off the road. The Contractor shall inform the County about the item and the location within 24 hours either by phone or e-mail. The Contractor may also encounter piles and/or built up areas of soil and vegetation that may require special removal methods during the sweeping operations. When this occurs, the Contractor shall furnish all labor, materials, equipment and manpower required to accomplish the removal of these piles and/or built up areas.

The Contractor may encounter parked vehicles in the pathway of the sweeping operation. If this occurs, the Contractor shall go around the vehicle. This area shall not be deducted, and shall be considered work accomplished.

The use of public roads and streets by the Contractor shall be accomplished with minimum inconvenience to the public and traffic.

All work shall be ordered by the Project Manager or designee with a Notice to Proceed. A new monthly cycle shall not be started until a Notice to Proceed has been issued to the Contractor. Verbal orders can be issued by the Project Manager or designee or designee but shall be followed by a written Notice to Proceed within two (2) workdays. Work shall start within 10 calendar days of receipt of the Notice to proceed. All work ordered must be completed within the timeframe specified.

**Basis of Payment**

Curb feet = a minimum of eight (8') foot wide by one (1') foot long [8'x1'].

Continuous turn lane = a minimum of twelve (12') foot wide by one (1') foot long [12'x1'].

Payment shall be based on swept feet completed and accepted to the nearest foot.

Monthly payment requests for all street sweeping shall be submitted to the Road Operations Senior Contracting Officer or designee for review and approval.

Monthly payment requests for all trail sweeping shall be submitted to the Parks and Trails Division.
